May 2025

ABSTRACT

In today's fast-paced world, convenience is essential. Customers celebrating birthdays, anniversaries, or expressing sympathy often find it challenging to visit physical flower shops due to distance and time constraints. Traditionally, placing an order required in-person visits, which were time-consuming and inconvenient.

Angelindesey Flower Shop recognizes the need for modernization and convenience. To meet this demand, the business is developing a customized online flower shop system that allows customers to browse, select, and order flower arrangements directly from their computers or mobile devices. This system supports both standard bouquets and custom floral designs tailored for various occasions.

Project Overview

The system will serve as a user-friendly platform where customers can easily view products, make selections, and finalize purchases without visiting the store physically.

Project Objectives

The primary goal of this project is to streamline the flower ordering process by creating a user-friendly online system where customers can easily browse, select, and place orders for flower arrangements. The website will be visually appealing, mobile-responsive, and accessible across different devices. It will cater to various flower categories such as birthdays, anniversaries, weddings, sympathy, and other special occasions, making the shopping experience more convenient and personalized. The system will help expand the flower shop's customer reach by offering online access to products and services.

In addition to improving customer experience, the system will support the shop owner in managing business operations. It will feature real-time inventory tracking to monitor stock availability and avoid shortages. Sales records will be stored and processed to generate reports on profit, loss, and total revenue. A centralized database will hold all essential data, including customer information, order history, product details, and payment records. This will enable efficient order processing, better customer relationship management, and informed decision-making to support business growth.

Project Scope

This project involves developing an integrated Inventory and Customer Management System for Angelindesey Flower Shop that requires customers to register and log in first before placing any orders. This login system ensures secure handling of customer information and allows the shop to maintain accurate order histories. Once logged in, customers can browse a wide selection of flowers and bouquets, using search and filter options to easily find the products they want.

After selecting their desired items, customers add them to a shopping cart and proceed to checkout, where only online card payments are accepted—no cash payments. Upon successful payment, the system generates an order confirmation along with a digital receipt, storing all relevant order and payment details within a centralized database. Customers are required to reserve a pickup date for their flowers, and if they miss this date, the system allows a grace period of 3 additional days for claiming their orders.

While the system itself does not provide delivery services, customers may choose to arrange delivery independently through third-party providers such as Grab. On the backend, the system updates inventory levels in real-time and tracks sales and customer data, helping the shop owner manage stock, monitor revenue, and improve overall business operations.

Target Audience

The Angelindesey Flower Shop online system is designed to serve a diverse group of users. Primarily, it targets busy individuals who need quick and convenient access to floral arrangements without the need to visit a physical store. These users value efficiency and accessibility, making an online platform ideal for their lifestyle. The system also caters to customers celebrating special events such as birthdays, anniversaries, and weddings, providing them with a wide selection of flowers and bouquets suitable for these occasions. Additionally, it serves people who wish to express emotions—whether sympathy, gratitude, love, or encouragement—by sending meaningful floral gifts in an easy and thoughtful manner. Beyond the customers, the business owner is a critical user of the system, benefiting from its inventory management, sales tracking, and customer data organization features, which help streamline operation and create more business opportunities.

USER MANUAL

WELCOME PAGE

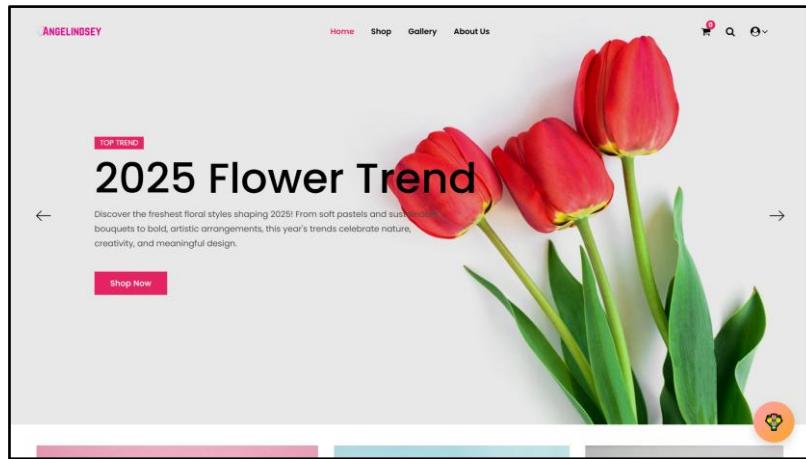

Figure 1: Welcome Page

- The Welcome Page of the flower shop of Angelinsey highlights upcoming floral styles and available flowers. Navigation links for Home, Shop, Gallery, and About Us are visible at the top.

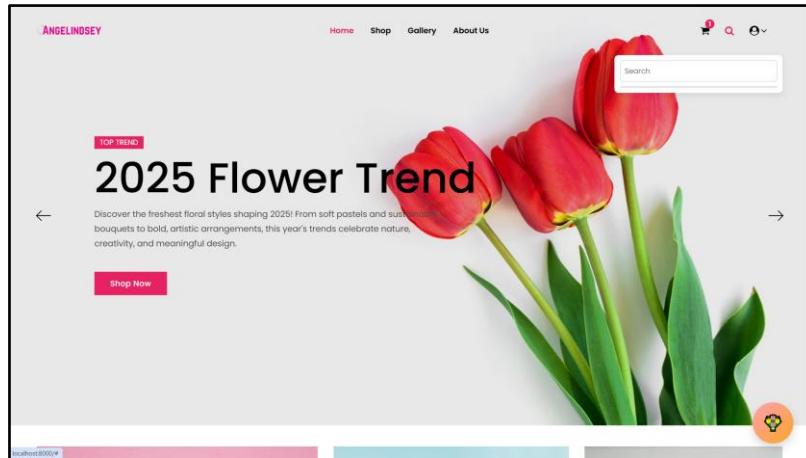

Figure 2: Search Bar

- The search bar interface, allowing users to quickly find products or content by typing keywords.

- Icons next to the search bar include a shopping cart with a notification badge, a search icon, and a user profile icon with a dropdown arrow, indicating account and navigation functionalities.

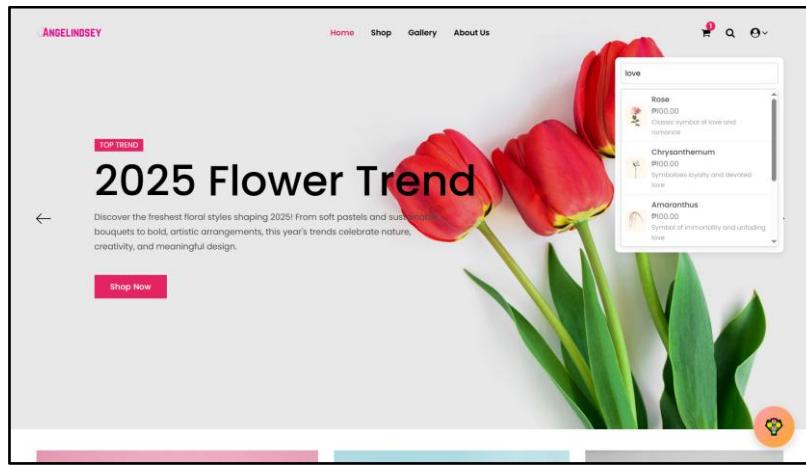

Figure 3: Search Bar Product Results

- As you can see when the user types different words associated with the description it also displays these flowers associated with the concept of it, example given is love which is connected with flowers such as Rose, Chrysanthemum, and Amaranthus, each with symbolic meanings related to love or devotion.
- The search results are based on symbolic relevance to the keyword "love," not just product names. It can also be used for different emotions such as "loyalty", "alluring", "devoted", etc.

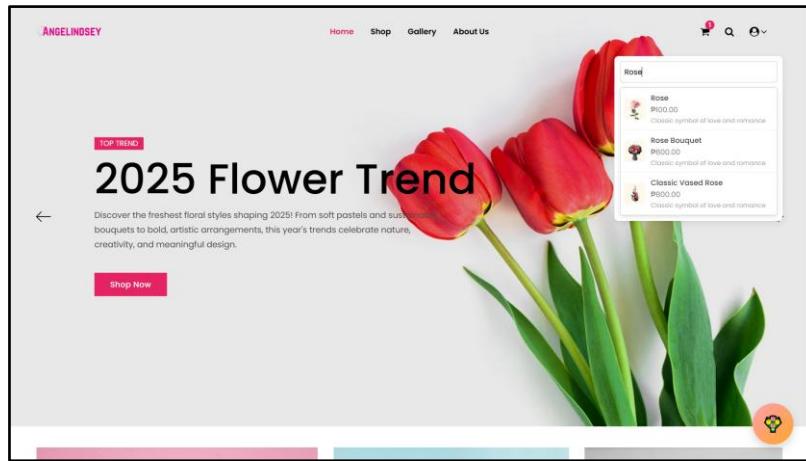

Figure 4: Search Bar Product Results

- The user typed "Rose" into the search bar, and the system displayed recommended products containing that flower in their names. The results include different variations like "Rose", "Rose Bouquet", and "Classic Vase Rose", all with similar romantic descriptions.

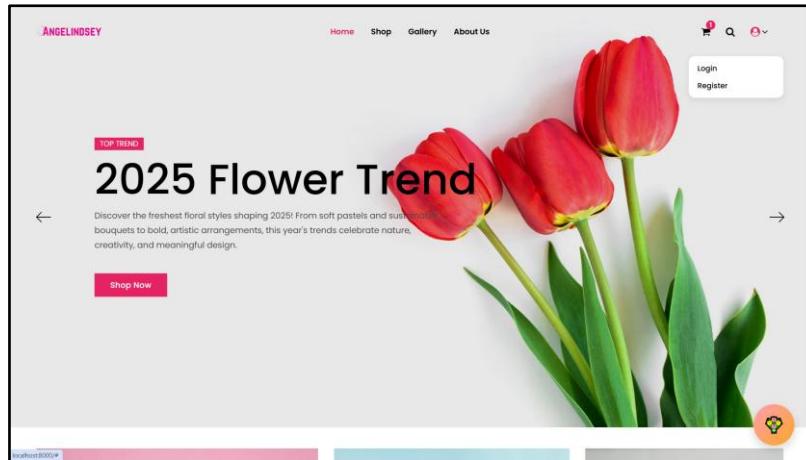

Figure 5: Login and Register

- Next to the search button is the User Login and Registration

Pamantasan ng Lungsod ng Pasig
Alkalde Jose St. Kapasigan, Pasig City
College of Computer Studies

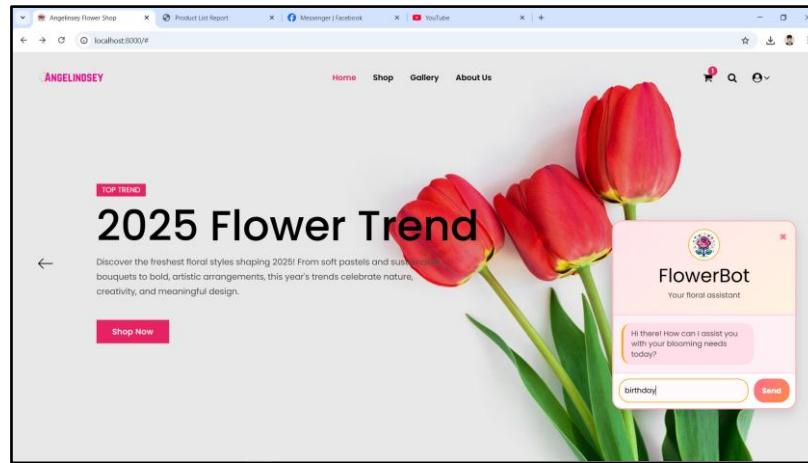

Figure 6: FlowerBot

- The user is interacting with a chatbot named FlowerBot, a floral assistant, asking for help with the keyword "birthday".
- The message input shows "birthday" typed by the user, and the Send button is highlighted, indicating the message is ready to be sent.

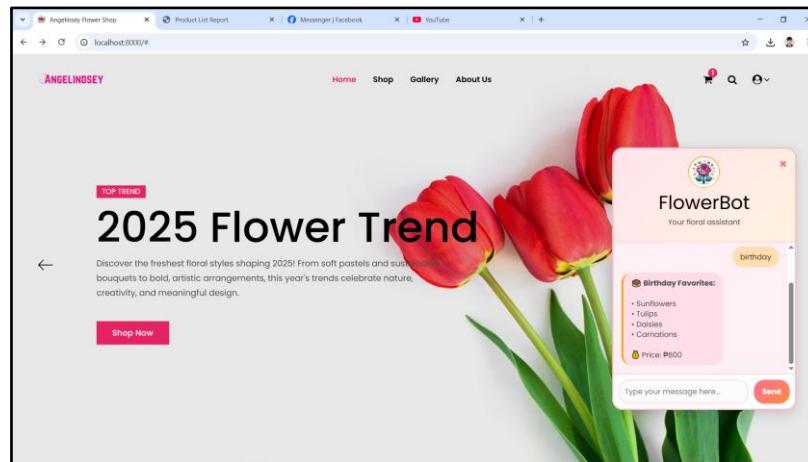

Figure 7: FlowerBot

- FlowerBot responds with "Birthday Favorites:", listing flower suggestions: Sunflowers, Tulips, Orchids, Carnations.
- The chatbot also provides a price for the listed flowers, which is ₱800, and displays a scroll bar for more options.

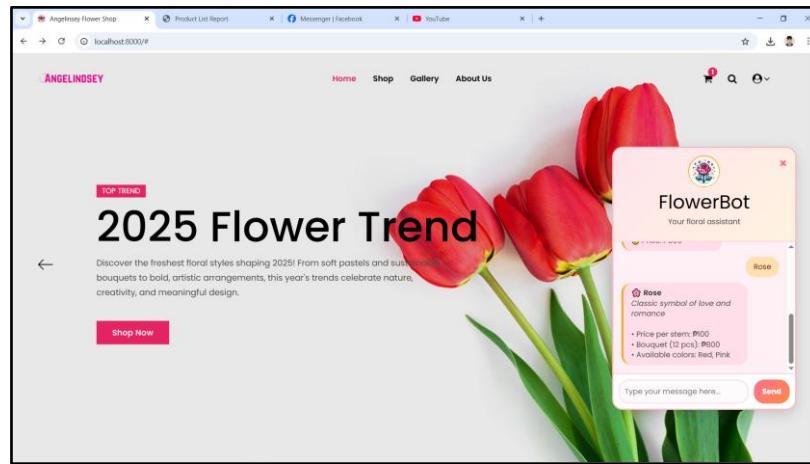

Figure 8: FlowerBot

- The user typed "Rose" in the FlowerBot chat, prompting a response about roses. FlowerBot replies with detailed information: roses are a symbol of love and romance, priced at ₱80 per stem or ₱800 per bouquet (10-pack), and available in red and pink colors.

Pamantasan ng Lungsod ng Pasig
Alkalde Jose St. Kapasigan, Pasig City
College of Computer Studies

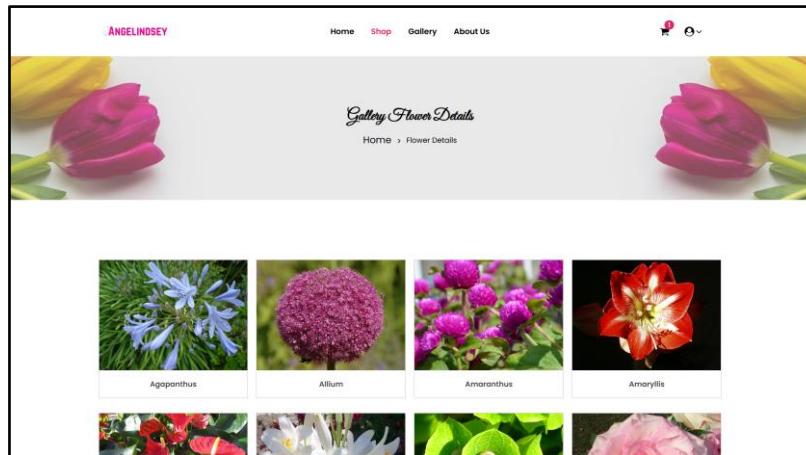

Figure 9: Gallery

- The gallery showcases a grid of flower images, each labeled with the flower's name such as "Agapanthus," "Allium," and "Amaranthus."
- It is organized neatly in rows and columns, creating a clean and visually appealing layout for easy browsing.

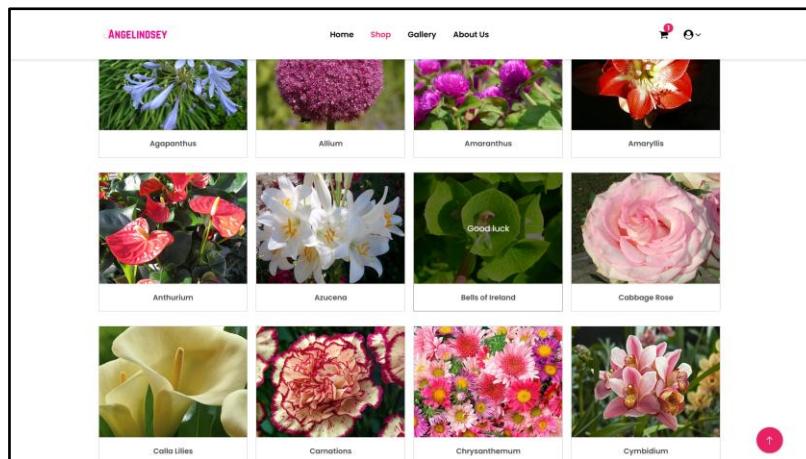

Figure 10: Gallery

- When hovering over a flower image (e.g., "Bells of Ireland"), a subtle dark overlay appears with text like "Good Luck," adding interactivity.
- This hover effect provides additional information or a label without cluttering the default view. This is also evident to other flowers seen in the gallery.

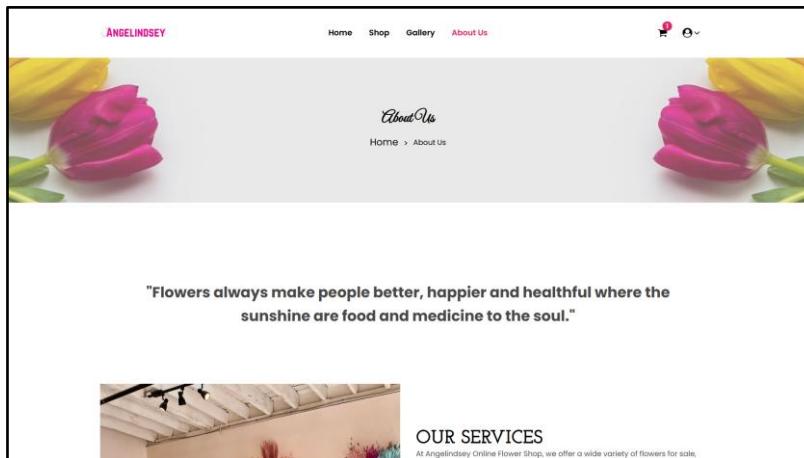

Figure 11: About Us

- The page opens with a soft banner image of tulips and a title section displaying "About Us".
- A large quote in bold typography follows: "Flowers always make people better, happier and healthful...", setting an emotional and welcoming tone.

OUR SERVICES
At Angelindsey Online Flower Shop, we offer a wide variety of flowers for sale, perfect for any occasion. From elegant wedding decorations to stunning flower bouquets, we provide beautiful floral arrangements to suit your needs. Our customization services allow you to create personalized flower designs, ensuring that every bouquet is unique and special.

VISION
Our mission is to provide our customers with the highest quality flowers and exceptional service. We strive to create beautiful and unique floral arrangements that exceed our customers' expectations. Whether it's for a wedding, a special occasion, or just to brighten someone's day, we are dedicated to making every moment memorable with our flowers.

MISSION
At Angelindsey Online Flower Shop, we offer a wide variety of flowers for sale, perfect for any occasion. From elegant wedding decorations to stunning flower bouquets, we provide beautiful floral arrangements to suit your needs. Our customization services allow you to create personalized flower designs, ensuring that every bouquet is unique and special.

Figure 12: About Us

- On the right, there are clear headings and brief descriptions for Our Services, Vision, and Mission, explaining the shop's offerings, goals, and values.
- On the left, a cozy flower shop image enhances visual appeal and adds authenticity by showcasing real floral arrangements and products.

A little story about us

Angelindsey Flowershop Flowers and Greens

Established in November 2003, Flowers and Greens is a floral shop that has been providing blooming florist services and flower delivery for more than a decade now. We offer colorful, well-thought out creations that showcase not only our fresh flowers but also our staff's experience in

Figure 13: About Us

- In this part, it tackled a brief and summarized story of how the flower shop was created. It talked about the date of its creation and the reason why it was created.

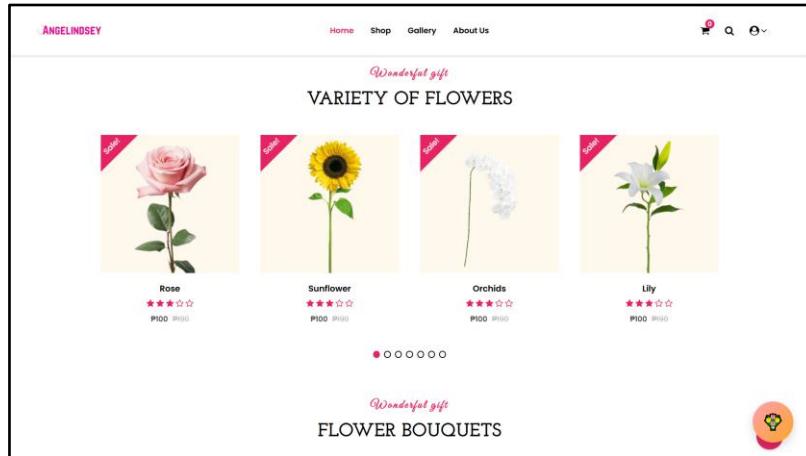

Figure 14: Products of Variety of Flowers

- This section showcases individual flower types like Rose, Sunflower, Orchids, Lily, etc, each with pricing, star ratings, and sale tags.
- The circle designs (pagination dots) beneath the products allow users to navigate through multiple flower options on different slides/pages.

The screenshot shows a user profile page with the following sections:

- Personal Information:** Displays the name "Maxine Ady Diano" and an email field containing "diano@gmail.com". A "SAVE" button is present.
- Update Password:** Contains fields for "Current Password", "New Password", and "Confirm Password", each with a "SAVE" button below it.
- Delete Account:** A warning message stating "Once your account is deleted, all of its resources and data will be permanently deleted. Before deleting your account, please download any data or information that you wish to retain." with a "DELETE ACCOUNT" button.

Figure 42: Delete Account

- The user can also deactivate or delete its account associated with its personal information and its order history. It ensures the privacy of the user and prevents the user from logging in and making future purchases from its account.

ADMIN LOGIN PAGE

The screenshots show the Admin Login page with the following variations:

- Unauthorized Access:** Shows a message "You are not authorized as an admin." above the login fields.
- Successful Login:** Shows the login fields filled with "christian@gmail.com" and a redacted password, with the "LOG IN" button.
- Password Entry:** Shows the login fields filled with the same email and password, with the "LOG IN" button.

Figure 43: Admin Login

- Admin enters email and password on the login page.

- A “Remember Me” checkbox lets admins stay logged in on future visits.
- A “Forgot Password” link initiates a password reset via email.
- When the Submit button is clicked, the system verifies the credentials.
- If credentials do not match an authorized admin, an error message displays: “You are not authorized as admin.”
- Unauthorized users cannot access the admin dashboard or database.
- Access requires an admin account created by the backend system administrator.
- Only verified admins can access sensitive areas such as inventory, sales data, and customer records.
- If credentials are valid, clicking Login grants access to the database and management features.
- Authorized admins can manage inventory, sales, customer info, and system settings.

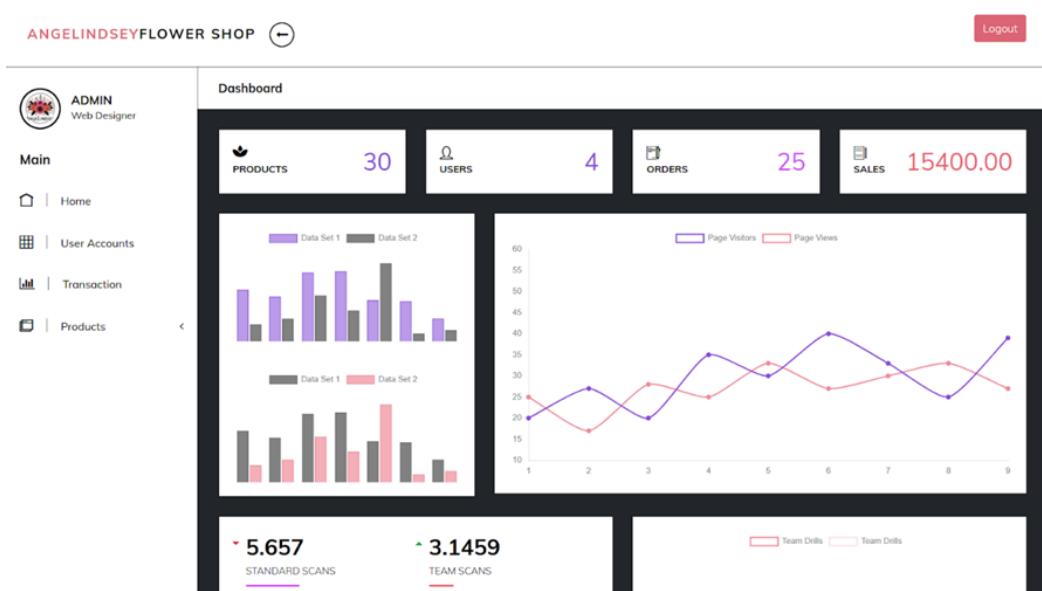

Figure 44: Admin Home Dashboard

- Home Admin Dashboard includes main sections: Home, User Accounts, Transactions, and Products.
- A line graph and bar graph are displayed to visually track product sales trends over time.
- The dashboard provides real-time monitoring of:
- Products – A list of 30 flower and bouquet items. the system displays all inventory items.
- Users – Displays all registered customer accounts. It shows the user list with profile and activity details
- Orders – Shows complete order history with dates and statuses.
- Sales Data – Tracks the total revenue from customer purchases.

- Includes a search function by Name or Customer ID for easy lookup.

Figure 47: Export User Information

- User clicks either the PDF or CSV (Excel) export button.
- A confirmation prompt appears with the message: “Are you sure you want to toggle the status ?”

- The prompt has two options: OK and Cancel.
- If the user clicks OK, the file downloads in the selected format (PDF or CSV).
- If the user clicks Cancel, the export is canceled and no file is downloaded.

Figure 52.1: Order Status Update Notification

- Admin can set the status of all orders for a user (example “Orchids” orders) to Pick-up with a Yes or Cancel prompt.
- If Yes is selected, the user receives an email or message notification to pick up their items.

Pamantasan ng Lungsod ng Pasig
Alkalde Jose St. Kapasigan, Pasig City
College of Computer Studies

- If Cancel is selected, no changes are made to the order status.

ID	User Name	Product	Quantity	Price	Total	Payment	Claim Date	Claim Time	Status	Actions

Figure 52.2: Order Status Update Notification

- When the **Claim button is clicked**, a prompt message appears saying, “Set status of (example “Orchids”) for this user to **Claimed?**” with **Yes and Cancel options**.
- If **Yes** is selected, the system updates the **order status to Claimed**, confirming that the user has claimed the flowers.
- If **Canceled**, no changes are made to the order status.
- Admin can then **update the status to Claimed** when the **user claims the flowers**.

Figure 56: Exported Data (CSV Format)

- Clicking the **Excel (CSV)** button downloads the transaction file in **CSV (Excel) format.**
- To add new items with the necessary detailed information, such as the product name or title, description, price, quantity or stocks, category, and image, use the Add Product View feature.

The screenshot shows the 'Add Products' page. On the left, there's a sidebar with a user icon labeled 'ADMIN Web Designer' and navigation links for Main, Home, User Accounts, Transaction, and Products. The main content area is titled 'Add Products'. It contains several input fields: 'Product Title' (text box), 'Description' (text box), 'Price' (text box), 'Quantity' (text box), 'Color' (text box), and 'Category' (dropdown menu with options 'Select a Option', 'Stem', 'Bouquet', and 'Vase'). Below these is a 'Product Image' field (represented by a black rectangle). At the bottom is a green 'Add Product' button.

Figure 57: Add Product View

- The only options available in the category are flower stems, bouquets, and vases.
- The admin can now add a product once all the necessary data has been collected, and a pop-up notification will appear as confirmation.

The screenshot shows a web-based administration interface for a flower shop. On the left is a sidebar with a user profile for 'ADMIN Web Designer' and navigation links for Home, User Accounts, Transaction, and Products. The main area is titled 'Products' and displays a table of product information. The table has columns for Name, Color, Category, Price, Stocks, and Actions. Each row contains a green edit icon and a red delete icon. At the top right of the table are 'Export PDF' and 'Export CSV' buttons. A progress bar at the top right indicates 'Products (3).pdf 6.3 KB - Done'. The URL in the address bar is 'localhost:8000/view_product'.

Name	Color	Category	Price	Stocks	Actions
Amaranthus	Pink	stem	100	70	
Amaranthus Bouquet	Mixed	bouquet	800	20	
Anthurium	Red	stem	100	20	
Anthurium Bouquet	Red	bouquet	800	20	
Carnation	Pink	stem	100	20	
Carnation Bouquet	Pink	bouquet	800	20	
Chrysanthemum	White	stem	100	20	
Chrysanthemum Bouquet	Mixed	bouquet	800	20	

Figure 63: Product Export Notification

- Depending on the administrator's preference for simple product documentation or the product's supplied file format, the export option may be either PDF or CSV.

The screenshot shows a PDF document titled 'Product List Report'. The document contains a single table with data. The table has columns for Name, Color, Category, Price, and Stocks. Each row lists a different flower or bouquet type with its corresponding details. The URL in the address bar is 'C:/Users/Acer/Downloads/Products%203.pdf'.

Name	Color	Category	Price	Stocks
Rose	Pink	stem	100	15
Sunflower	Yellow	stem	100	5
Orchids	White	stem	100	49
Lily	White	stem	100	10
Carnation	Pink	stem	100	20
Chrysanthemum	White	stem	100	20
Daisies	White	stem	100	20
Amaranthus	Pink	stem	100	70
Lavender	Magenta	stem	100	20
Anthurium	Red	stem	100	20
Rose Bouquet	Red	bouquet	800	18
Orchids Bouquet	White	bouquet	800	20
Lily Bouquet	White	bouquet	800	19
Carnation Bouquet	Pink	bouquet	800	20
Chrysanthemum Bouquet	Mixed	bouquet	800	20
